

To Whom It May Concern:

When I first seen the ads regarding the Lease purchase program, I was very leery, but kept on an eye on the website for about 1.5-2yrs and seen the properties that were being listed, were all very local to me and I could drop by anytime to verify what I was seeing on the website as accurate... When my husband and I decided we were really going to look into this when our lease was up, we had our eye on this one particular cape cod across town, and were shocked that this house was still up for lease-purchase after several months. We decided "this is it"! The monthly payments were less than our rent, our dogs had a yard, and we could work on our credit for a year and hope things went our way to purchase the house, and keep our fingers crossed this wasn't one of those "if it's too good to be true, it probably is" scenarios... After a year we started to work on the purchase of the home, and after a few snags, we finally got it! Greg is great to work with, we never had any problems, and I'm so grateful he dealt with my panic and paranoia once our first year's lease was up! I would highly recommend a lease-purchase option through Creative Asset Management to anyone!

Sincerely,

The Happy Homeowners of 115
